

Project Manager - Team Leader

Job description, information about the position

Working as a Project manager / Team Leader with enprovia Software Engineering, you'll support the project development, strategy and communication with customers. You'll lead and manage an engineering team of 6-9 people to ensure all the work is done efficiently and the strategy is well implemented.

We are a people-company. We have a strong focus on the company's most important asset: Our people. You will enjoy a very creative and dynamic environment where there are plenty of opportunities to realize your own ideas and grow further. We are looking for people with extraordinary skills who thrive in highly energetic, small and focused teams.

Job requirements:

- Highly skilled manager / leader to manage team of 6-9 people
- Dealing with complex business projects, project management
- Planning, organizing, leading effectively
- Strong leaderships and managerial skills, abilities and experience
- Soft skills on human resources level (communication, problem solving, leading, motivating)
- Communication with customer
- Eagerness, enthusiasm, creativity
- At least 5 years of team leading and project management experience

All applicants must have profound managerial skills and experience with project management and team leading and must be able to perform independently.

This opportunity offers a highly competitive remuneration package.
