Licensing & Pricing V1.2

enprovia[®] mDMS

1 Licensing & Pricing

enprovia® mDMS consists of two parts: 1) a server component, the mobile Enabler and 2) a client component available for Apple iPhone/iPod and RMI BlackBerry. Support for further devices is continuously added.

The licensing and pricing model of our enprovia® mDMS is kept intentionally as simple as possible. The prices below are only valid for use with an MS Sharepoint or Alfresco DMS installation. For prices and licenses when used with Scalaris® ASP, you should contact [Scalaris](#).

1.1 On-Premise / In-House

You host the mobile Enabler (gateway) on your own infrastructure. First client connection is free. Both usage of the gateway and the license to run up to one mobile device connected to it is free. Yes, no charge! Its unique ID identifies each mobile unit and if you want to use two or more devices, you pay a monthly subscription fee of only 3.90 EUR per device. This makes it easy to extend your fleet of mDMS devices while maintaining strict cost control and overall low costs. The monthly subscription includes free software upgrades of both the mobile Enabler server and client software throughout the contract period. Online support for installation offered separately.

Minimum contract period is 12 months. We award longer period contracts as follows: -5% for 24 months, -10% for 36 months and -20% for 48 months contract. Billing is done monthly.

Example 1: You want to connect one mDMS client to your mobile Enabler environment.

Price: 0 EUR

Example 2: You want to connect four mDMS clients to your mobile Enabler environment and decide to go with a 24 month contract.

Price: $3 \times 3.90 = 11.70 - 5\% = 11.12$ EUR/monthly in subscription (since the first device is free, you only pay for three). Includes all software upgrades within the subscription period.

Example 3: You want to connect 255 mDMS clients to your mobile Enabler environment and you decide to sign up for a 36 month contract.

Price: $254 \times 3.90 = 990.60 - 10\% = 891.54$ EUR/monthly in subscription (one device is free). Contains of course all software upgrades within the subscription period.

1.2 On-Demand / Hosted - ASP

We host the mobile Enabler system on our high availability server cluster in Frankfurt, Germany. You have web access to the system and can provision new, additional mDMS clients on a per-need basis. The system must have secure (https) access to your MS Sharepoint or Alfresco installation.

One-time setup fee: 490 EUR including online support. No setup fee for 48 month contracts. All software upgrades included during the contract period.

Each connected mDMS client is billed 4.90 EUR/month. Minimum contract period is 12 months. We award longer period contracts as follows: -5% for 24 months, -10% for 36 months and -20% for 48 months contract. Billing is done monthly.

Example 1: You want to connect up to 11 unique devices per month.

Price: You pay $10 \times 4.90 = 49$ EUR/month if you sign up for a 12 month contract. Setup fee is one time 490 EUR.

Example 2: You want to connect up to 15 devices per month for a 48 month contract.

Price: You pay $14 \times 4.90 = 68.60$ EUR – 20% = 54.88 EUR/month. Setup fee is waived.

Example 3: You want to extend your currently used 15 devices to 18 devices and you are on a 36 month contract with 25 months left of contract.

Price: You pay for an additional 3 devices ($3 \times 4.90 = 14.70$ - 5% for 24 month contract = 13.96 EUR/month additionally) until the contract ends: Contract termination date is not extended when you add devices.

2 Final words

enprovia® Software Engineering s.r.o. is headquartered in Bratislava, Slovakia (60km from Vienna, Austria) with a subsidiary in Donaueschingen, Germany. You find us on the net at www.enprovia.com.

2.1 Our product portfolio

Our customers achieve faster results and better value at higher quality using our products and services. See: www.enprovia.com/products for more information.

enprovia® mShop/mPresence – mobile enable your ecommerce. Expand your customer base and reach out to new, potential customers with mobile commerce on iPhone, Blackberry, Android and other smart phones. Connect to the most common ecommerce solutions “out-of-the-box”. Available both as On-Demand/ASP and On-Premise.

enprovia® mDMS – mobile enable your Document Management and Electronic Content Management Systems. Access your data anywhere at anytime. Access your core assets securely and store documents in a secure offline storage. Receive notifications when documents, meta-data and folders/matters change. Available both as On-Demand/ASP and On-Premise.

enprovia® mobile enabler – A java based middleware technology allowing you to easily add plugins and business logic to fulfill your business requirements, mobile enabling your existing business systems with no modifications. Available both as On-Demand/ASP and On-Premise.

enprovia® Annotate Expert – Rapidly annotate images, keyword & tag them using loadable ontology and share within teams. Strong search technology through large sets of images stored in distributed archives. Perfect for e.g. architects, construction & civil engineering, aerospace engineering, health care, retouching and photography.

2.2 Our solutions portfolio

We provide full software lifecycle management to our international customers.

Web Portal solutions

- Intranet, Extranet, Internet, ASP, SaaS, SEO&SEM, campaign management, newsletter and bulk mailing
- Value: Ready-made templates, deploy in days not months

Mobile business solutions

- Access your data anywhere, anytime, localized and geo-targeted
- Value: Mobile enabling technology for business with existing connectors and SDK's for iPhone, BlackBerry, Android and MS Mobile. Deploy in days not months. Available both as On-Demand/ASP and On-Premise.
- Extend your eCommerce or Document Management System with our mPresence and mDMS solutions.

Image management solutions

- Find and visualize documents, images and data stored in business backend systems.
- Value: Advanced search technology, smart & easy annotation with loadable ontology support. Ready-made tools available to reduce time and increase process quality.

Business integration

- Reduce costs and effort in B2B integration with our integration specialists
- Value: Ready-made components reduce time-to-market and increase quality

Custom development

- Tailor made solutions
- Value: Strong JEE, Java, .NET skills. Any team configuration (your team, inhouse/external/expertise injection, teaching). Fix pricing possible.
